

REQUEST FOR PROPOSAL (RFP)

Grid-Connected Solar Power Plant — Design, Supply and Installation

RFP Reference: OGDCL-SOLAR-2026-042

Issuing Authority: Oil & Gas Development Company Limited (OGDCL)

SECTION 1 — INTRODUCTION

OGDCL invites sealed proposals from qualified firms for the design, supply, installation and commissioning of a 12 MW grid-connected solar power plant, including SCADA network design and cloud-based monitoring infrastructure.

SECTION 2 — MANDATORY REQUIREMENTS

2.1 The bidder shall demonstrate at least one completed solar energy project of comparable scale within the last seven years.

2.2 The bidder must hold a valid ISO 9001 quality management certification.

2.3 The proposed monitoring solution shall include secure cloud infrastructure hosting with ISO 27001 certified information security controls.

2.4 The bidder is required to provide network design services for the plant SCADA and telemetry systems.

2.5 All electrical works must comply with applicable national grid codes.

SECTION 3 — PREFERRED QUALIFICATIONS

3.1 Experience with federal government or provincial government clients is preferred.

3.2 The bidder should provide evidence of CMMI Level 3 or higher process maturity.

3.3 Fleet management capability for construction logistics is desirable.

SECTION 4 — EVALUATION CRITERIA

Technical capability and certifications: 35%

Relevant solar energy experience: 30%

Financial proposal: 25%

Project timeline and methodology: 10%

SECTION 5 — KEY DATES

Pre-bid conference: 28 June 2026

Deadline for written queries: 2026-07-06

Proposal submission deadline: 20 July 2026

Expected contract award: 5 September 2026

SECTION 6 — FINANCIAL TERMS

The estimated project budget is PKR 424M.

A bid security of PKR 4.2M must accompany each proposal.

Payments will be milestone-based with 10% retention until commissioning.

SECTION 7 — QUESTIONS TO BIDDERS

Q1: Describe your solar energy project experience and installed capacity?

Q2: What is your approach to SCADA network design for power plants?

Q3: How will you secure the cloud-based monitoring infrastructure?

Q4: Describe your project team and relevant certifications?
